Latest Star Ratings messaging, 20 buying-committee contacts

Prepared by **Dallas Andrews** · GTM Engineering · v2.4.1 messaging · 2026-07-22

These are the latest outreach drafts from the Stars engine after this week's messaging pass, one per contact across the first-wave buying committees. Each email is generated from the plan's **own public CMS Star Ratings data**, leads with where the movable service-measure points sit, names the **Dynamic Workforce Orchestration platform**, and carries a single verified Humana proof point framed operationally. Sharing for feedback ahead of campaign kickstart. These go out as plain-text emails from Nathan; the formatting here is only for review.

Melissa (Mel) Chapman

SENIOR DIRECTOR OF MEMBER EXPERIENCE · DEVOTED HEALTH

Subject: the service side of Devoted's gap

Hi Mel,

For plans sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data, the customer-service star across Devoted Health's contracts is sitting at 2.7 right now. That's roughly \$31M a year in addressable bonus across the 11 contracts, though you'll have a far sharper read on that than I will. The clinical side looks to be in decent shape by comparison, so the service measures are the lever your team can still pull this cycle.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Jeff Ingram

DEPUTY CHIEF FINANCIAL OFFICER · L.A. CARE HEALTH PLAN

Subject: bonus dollars riding on 4.0

Hi Jeff,

There's roughly \$13.4M a year in quality-bonus dollars addressable through the service side of L.A. Care's Medicare Advantage book, and missing 4.0 by a fraction costs the same as missing it by a lot, it's a full cycle of bonus either way. The book is sitting at 3.0 right now, a full star under the line, though your read on the exact figure will be sharper than mine.

The points still in play this cycle sit in the customer-service and CAHPS measures, which come down to how the service operation runs day to day, so that's the part with room to move before the clinical side even enters the picture.

That's where our Dynamic Workforce Orchestration platform fits: it reprioritizes work across queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

If it helps, I can pressure-test that math against how you're framing the gap. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Nancy Huang

CHIEF FINANCIAL OFFICER · CALOPTIMA

Subject: bonus riding on the 4.0 line

Hi Nancy,

There's roughly \$9.6M a year in quality-bonus dollars addressable across CalOptima's Medicare Advantage book once you get the contract over the 4.0 line, and missing by a fraction costs the same as missing by a lot, it's a full cycle of bonus either way. The contract is sitting at 3.0 right now, a full star under the line, though your read on the exact figure will be sharper than mine.

The points still in play this cycle are the operational ones, the customer-service measures, since those track how the service side runs day to day rather than anything clinical.

That's where our Dynamic Workforce Orchestration platform fits: it shifts work across queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Krista Dusil

CHIEF FINANCIAL OFFICER · MEDICA

Subject: bonus dollars riding on 4.0

Hi Krista,

There's roughly \$23.7M a year in quality-bonus dollars still addressable across Medica's Medicare Advantage contracts, and missing the 4.0 line by half a star costs the same as missing it by a lot, it's a full cycle of bonus either way. The book is sitting around 3.5 right now across three contracts, though your read on the exact figure will be sharper than mine.

The piece still in play this cycle is operational, the customer-service measures, which come down to how the service side runs day to day rather than anything clinical.

That's where our Dynamic Workforce Orchestration platform fits: it reprioritizes work across queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

If it helps, I can pressure-test that math against how your team is framing the gap. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Christopher Phillips

INTERIM CFO AND VP OF FINANCE · CAREFIRST BLUECROSS BLUESHIELD

Subject: where CareFirst's movable dollars sit

Hi Christopher,

There's roughly \$5.9M a year in quality-bonus dollars sitting in CareFirst's customer-service measures, part of an estimated \$22.6M across your Medicare Advantage book, and missing the 4.0 line by half a star costs the same as missing by a lot, it's a full cycle of bonus either way. Your read on the exact figure will be sharper than mine.

The piece still movable this cycle is operational, how the service side runs day to day, since that's what the customer-service and CAHPS measures track.

That's where our Dynamic Workforce Orchestration platform fits: it shifts and reprioritizes work across queues in real time so service levels hold on the days that usually slip. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Dan Quinn

VP, CHIEF ACTUARY · DEVOTED HEALTH

Subject: the service-measure window before December

Hi Dan,

There's an est. \$31M a year in quality-bonus dollars sitting in customer-service measures across Devoted Health's Medicare Advantage contracts, and missing the 4.0 line by half a star costs the same as missing by a lot, it's a full cycle of bonus either way. Your book is sitting at 3.5 right now across 11 contracts, though your read on the exact figure will be sharper than mine.

The points still in play this cycle are the operational ones, since the customer-service measures come down to how the service side runs day to day, and those are scored only through December.

That's where our Dynamic Workforce Orchestration platform fits: it reprioritizes work across queues in real time so service levels hold when volume swings. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

If it helps, I can pressure-test that math against how you're framing the gap. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Shawn Larsen

VICE PRESIDENT, QUALITY & STARS · MEDICA HEALTHCARE PLANS

Subject: where Medica's last points sit

Hi Shawn,

For plans sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data your Medicare Advantage contracts sit right around 3.5, with the customer-service star at 3.8 and still the more movable side of the two. That's roughly \$23.7M a year in addressable bonus across your three contracts, though you'll have a far sharper read than I will.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

LaTonya Augustine

DIRECTOR OF CAHPS AND STARS · CLEVER CARE HEALTH PLAN

Subject: the service side of Clever Care's gap

Hi LaTonya,

For a contract sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data, the customer-service star is sitting at 3.0 right now, which is behind the clinical side. That works out to roughly \$21.2M a year in addressable bonus tied to those service measures, out of about \$24.5M total, though you'll have a far sharper read than I will.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

W. Bradley Yale

CHIEF FINANCIAL OFFICER · DEVOTED HEALTH

Subject: where Devoted's bonus dollars concentrate

Hi Bradley,

There's roughly \$31M a year in quality-bonus dollars addressable across Devoted Health's Medicare Advantage contracts, and missing the 4.0 line by half a star costs the same as missing it by a lot, it's a full cycle of bonus either way. Your clinical star is already north of 4, so the piece holding the book under the line is the customer-service side, which is also the part still in play this cycle.

That's the operational lever, how the service operation runs day to day on complaints, appeals, and access, and it's what actually moves before December.

Our Dynamic Workforce Orchestration platform fits there: it reprioritizes work across queues in real time so service levels hold on the days that usually slip. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where those dollars concentrate might be useful before the window closes. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Peter Kuipers

CHIEF FINANCIAL OFFICER · CLOVER HEALTH

Subject: what a service measure is worth at 3.5

Hi Peter,

There's an est. \$49.1M a year in quality-bonus dollars sitting inside Clover Health's customer-service measures right now, and missing the 4.0 line by half a star costs the same as missing it by a lot, it's a full cycle of bonus either way. Your book is sitting at 3.5 stars, so that gap is close enough that the service side alone could be what decides it, though your read on the exact math will be sharper than mine.

The points still in play this cycle come down to how the service operation runs day to day, complaints, appeals, customer service, the parts that move on their own timeline.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across queues in real time so service levels hold on the days that usually slip. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Ben Grabski

CHIEF FINANCIAL OFFICER · LUMERIS

Subject: where Lumeris's gap concentrates

Hi Ben,

There's an est. \$8.1M a year in addressable bonus dollars on Lumeris's Medicare Advantage book right now, and missing the 4.0 line by half a star costs the same as missing it by a lot, it's a full cycle of bonus either way. The customer-service star is sitting at 3.1, so that's likely where the gap concentrates, though you'll have a far sharper read on the numbers than I will.

The piece still movable this cycle is operational, the customer-service and complaints measures that track how the service side runs day to day.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold on the days that usually slip. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Steven Haggard

DIRECTOR, MEMBER EXPERIENCE · CLEVER CARE HEALTH PLAN

Subject: where Clever Care's last points sit

Hi Steven,

For plans sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data Clever Care's Medicare Advantage contract sits right around 3.5, with the customer-service star at 3 against a clinical star closer to 3.8. That gap points to roughly \$21.2M in addressable bonus sitting in the service measures, though you'll have a far sharper read than I will.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

Julia Rosenbaum

ASSOCIATE VICE PRESIDENT, STARS · DEVOTED HEALTH

Subject: the service side of Devoted's gap

Hi Julia,

For plans sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data your Medicare Advantage contracts sit right around 3.5, with the customer-service star well below the clinical side, which is holding at 4.2. That puts an est. \$31M a year in addressable bonus across your 11 contracts in the service measures alone, though you'll have a far sharper read than I will.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Julee Smith

DIRECTOR, MEDICARE STARS · MEDICA

Subject: where Medica's last points sit

Hi Julee,

For plans sitting half a star under the 4.0 line, the last few points almost always come from the service side, the customer-service and CAHPS experience scores. Those track how the operation runs day to day, so they're the movable part, and the piece still in play this cycle.

On the public data your Medicare Advantage contracts sit right around 3.5 across the book, with the customer-service star at 3.8 and the clinical side a bit behind that. About \$23.7M a year in addressable bonus across Medica's three contracts sits in those service measures, though you'll have a far sharper read than I will.

That's what our Dynamic Workforce Orchestration platform does: it shifts work across your queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Niyum Gandhi

CHIEF FINANCIAL OFFICER & TREASURER · MASS GENERAL BRIGHAM

Subject: service-measure dollars before December

Hi Niyum,

There's an est. \$5.5M a year in quality-bonus dollars across Mass General Brigham's Medicare Advantage contracts sitting in measures tied to service operations, and missing the 4.0 line by half a star costs the same as missing by a lot, it's a full cycle of bonus either way. The two contracts are at 3.5 right now, though your read on the exact figure will be sharper than mine.

The points still in play this cycle sit in the customer-service and CAHPS measures, which come down to how the service operation runs day to day.

That's where our Dynamic Workforce Orchestration platform fits: it shifts work across queues in real time so service levels hold when volume spikes. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.

A quick read on where your movable points actually sit might be useful before the December window. Worth 15 minutes in the next couple weeks?

NATHAN BELFIELD · PIPELINE GENERATION LEAD · INTRADIEM

Michael W. Gardner, EdD, MBA

CHIEF FINANCIAL OFFICER · LUMERIS

Subject: bonus riding on the 4.0 line

Hi Michael,

There's roughly \$8.1M a year in addressable bonus dollars riding on Lumeris's Medicare Advantage book clearing 4.0, and missing by a fraction costs the same as missing by a lot, it's a full cycle of bonus either way. The contract is sitting at 3.0 stars right now, a full star under the line, though your read on the exact figure will be sharper than mine.

The part still in play this cycle is operational, the customer-service measures, which come down to how the service side runs day to day rather than anything clinical.

That's where our Dynamic Workforce Orchestration platform fits: it shifts and reprioritizes work across queues in real time so service levels hold on the days that usually slip. Humana cut average handle time by 45 seconds working with us, operationally, and I'm careful not to read that as a Stars number.
